

MycoApply® Liquid Endo Quart

MycoApply® Liquid Endo Quart is a concentrated liquid of 4 top performing endomycorrhizal fungi in distilled water used as a soil drench or seed inoculant. MycoApply® Liquid Endo Quart contains mycorrhizal fungi that colonize plant roots and extend the root system into the surrounding soil greatly enhancing the absorptive surface area of root systems and form an essential link between plant and soil. The plant enjoys improved nutrient and water uptake, root health and superior field performance.

The MycoApply® Difference

Reduces

- Drought stress
- Water inputs
- Transplant shock
- Nutrient loss

Increases

- Yields
- Fruiting & flowering
- Survivability

Promotes

- Rooting
- Nutrient uptake
- Self sufficient plants

Directions

Industry	Rates: The goal is to create physical contact between the inoculant and seed/root
Row Crops	One quart treats 10 acres during seeding.
Orchard: Mature	One quart will treat 2.5 acres.
Orchard: Young	One quart will treat 5 acres.
Other	Can be diluted or mixed with other compatible liquids during application.

Ingredients

Ingredient	Amount
Endo's	Glomus intraradices, G. mosseae, G. aggregatum, G. etunicatum: 238 propagules/ml. each.

Disclaimer: Statement of Claims: MA, Inc. certifies that this product contains the indicated mycorrhizal fungi and propagule rates stated on the label. The mycorrhizal symbiosis is sensitive to environmental conditions and MA, Inc. is unable to make guarantees beyond the above statements. Rev: 11-12-2011
